Gratuity

Basic Info

A gratuity is a sum of money given by an organization to certain workers for the service they have performed, in addition to the basic price of the service. Our software has 3 steps for gratuity calculation.

Steps

- Configuration
- Generate data
- Approval of generated data

Configuration

Basic Info

Since this software is multi-client, the software needs to work according to each client's needs. Configuration for gratuity serves the need for each customer.

Details

- **Eligible Employee Type:** The employee type for which this configuration will be applied to.
- **Effective Date:** The date from when this configuration will take effect.
- **Service Age From (Year):** From what Service Age (Year) of employee this configuration will take effect.
- **Service Age To (Year):** To what Service Age (Year) of employee this configuration will take effect.
- **Gratuity Basic:** Multiplier for gratuity calculation.
- **Eligible From:** Whether to calculate gratuity from confirmation date or joining date.

Generate data

Basic Info

Gratuity data is generated by an accountant, then the data is sent for approval.

Approval of generated data

Basic Info

Gratuity data needs to be approved before it is added to employee final Settlement.
